## New Extruder Expands Capacity and Capability

The latest addition to our facility is a 4 1/2" MPM extruder. Exemplary of our commitment to support our customers, this line was added specifically to support the growing needs of our customers. Not only does this new line add to our ability to supply high volume parts cost-effectively, it further expands our ability to produce parts with large areas. While a larger extruder may seem an unusual direction for a custom extruder, it is in fact a perfect example of our target market. At Profile Plastics, we do not look for customers and parts that fit our mold. Instead, we seek out the right opportunities with the right partners. And we tailor our processes to meet your specific needs. And if that means going in an unexpected direction, we are ready for the opportunity to learn and grow. So whether you have a small part or a large part, a small volume or a large volume, we are ready to work with you.

Profile Plastics, Inc. is a custom plastic extruder located in northeast Ohio and extruding a wide variety of materials and shapes. We are most effective when we can provide the best total cost through our ability to add value. This may include design assistance, various fabrication operations, custom packaging and labeling, inventory management or nearly any other process or service you may need. Profile serves a wide variety of industries and markets from agriculture to aerospace and from the medical industry to water and sewer. We do not look for customers or parts that fit our mold. Rather, we look for the right opportunities and find ways to tailor our processes and services to provide effective solutions for you. From your initial idea to the final product, Profile Plastics helps your plastic extrusions take shape. If you would like to learn how we can help you achieve your supply goals, please give us a call at 800-252-6458 or email [sales@profileplastics.com](mailto:sales@profileplastics.com).
